PROJECT

GPG Food Court / Diploma final year project

- This is an Android application with an admin panel. Food online order and billing.
- Tools and Technologies: Java programming, PHP, SQLite, PayPal, MySQL, Android Studio, Android programming.

Reminder App / Bachelor of engineering second

- A Reminder App can help you set reminders for different events that you have throughout the day. It'll help you stay updated with all your tasks for the day. It can be useful for all those who are not so good at organising their plans and forget easily. This would be a simple application whose task would be just to remind you of something at a particular time.
- Tools and Technologies: Java programming, SQLite, XML, Android Studio, Android programming.

Tic Tac Toe App / Bachelor of engineering third

- This is an Android Tic tac toe application is a two-player game wherein the players will have to choose either X or O in a 3x3 grid.
- Tools and Technologies: Java programming, SQLite, XML, Android Studio, Android programming.

Faculty Parent Connection / Bachelor of engineering

- Project based on helping faculty as well as parents to provide all information of students regarding academic.
- Tools and Technologies: JavaScript, PHP, HTML, CSS, MySQL.
